Programme Overview

Demand for practical, internationally recognized ESG expertise in Africa is rising rapidly due to mandatory disclosure requirements, evolving climate and sustainable finance regulations, increasing investor expectations, and the growing need for skilled sustainability professionals.

This intensive, industry-focused programme will equip corporate managers and aspiring ESG consultants with the practical tools, frameworks, and real-world skills to integrate ESG into corporate strategy, operations, and risk management.

What You Will Master

- **Reporting & Disclosures:** GRI, IFRS S1 & S2, and TCFD Climate Risk Reporting
- **Technical ESG:** Carbon Accounting (Scope 1–3), Double Materiality Assessment, and ESG Due Diligence
- **Strategy:** Developing ESG Roadmaps, ESMS (IFC Standards), and Social Impact ROI
- **Consulting Skills:** Proposal writing, client pitching, and ESG project management

Who Should Attend?

- Sustainability & ESG Managers
- Risk, Compliance & Governance Professionals
- Consultants & Advisory Firms
- CSR & Community Relations Managers
- ESG Data Professionals
- Bankers & Investment Professionals
- Development Finance Practitioners
- Aspiring ESG Consultants
